SUPPLEMENTAL AMENDMENT UNDER 37 C.F.R. § 1.115

Sir:

Applicants herewith submit the following Supplemental Amendment and
Remarks.

I. AMENDMENT

In the Claims:

Please add new claims 40-104 below.

40. (New Claim) A method of processing signals at a receiver station
based on at least one of a broadcast and a cablecast transmission including:
- (a) the step of receiving information content and at least one control
signal in said one of said broadcast and said cablecast transmission, said
information content and said at least one control signal including a first projected
datum, said first projected datum designating at least one of a product and a
service and being a projected first of a price and a quantity;
 - (b) the step of storing said first projected datum in a computer at said
receiver station;
